Product Manual | Instruction Guide | Management Presentation
June 2026

Executive Summary

Rishihood University runs a vibrant student life -- clubs, clans, events, competitions, reimbursements, achievements. But until now, all of it lived across WhatsApp group chats, scattered Excel sheets, and endless email chains. No single person ever had a clear picture of what was happening, what was approved, or where the money went.

LX Management OS is the single platform that replaces all of that. Built specifically for Rishihood, it brings every stakeholder -- students, club heads, clan heads, the LX team, the finance team, and management -- onto one screen. Every event, every booking, every rupee, every achievement is tracked, visible, and actionable in real time.

This document is your complete guide: what the platform does, why each feature was built, who can use what, and how to use it -- written for the people who will actually run it every day.

What Was Broken Before

Area	The Problem
Events & Rooms	Club heads sent room booking requests via WhatsApp or email. There was no way to know if a room was already booked, leading to conflicts on the day itself.
Reimbursements	Students submitted expense claims on paper or via email. Management tracked everything across 10+ separate Excel sheets. Finance had no visibility until a sheet was manually shared.
Club Activities	No central log of what each club was doing. Management could not see activity levels or hold clubs accountable without chasing people individually.
Clan Points	Points were tracked in Excel by hand. Any update required someone to find the file, edit it, and hope everyone was looking at the latest version.
Achievements	Student achievements were reported informally. There was no searchable record, no approval process, and no way to view achievements by student name.
Event Calendar	No shared calendar existed. Everyone relied on WhatsApp announcements that got buried in chat history within hours.
Budget Tracking	Budget allocation and spend were maintained in separate sheets per club. There was no live view of remaining budget across the institution.

Who This Is Built For

Before diving into features, it helps to understand exactly who uses this platform and what their day looks like.

About the User	Detail
Who they are	A 28-35 year old university administrator, LX team member, club coordinator, or finance manager at Rishihood University.
Daily reality	Juggling 40+ WhatsApp messages before 10am. Switching between 5-6 Excel sheets for different things. Replying to email threads about room bookings, expense approvals, and event requests -- all in parallel.
Technical comfort	Comfortable with smartphones and basic apps. Does not want to learn complex software. If it takes more than 3 taps to do something, they will go back to WhatsApp.
Core frustration	"I have no idea what is happening unless I ask someone directly." Things fall through the cracks because there is no single source of truth.
What they need	One place. One login. See everything. Approve with one click. Know where every rupee went. Works on phone too.
What success looks like	They open LX OS in the morning, see the dashboard, know exactly what needs attention, approve 3 pending items before their first chai, and move on.

Getting Started

LX OS is a web application -- it works in any browser on your laptop, tablet, or phone. No app download required.

How to Log In

1. Open your browser and go to: learnerexperienceos.vercel.app
2. Click "Sign in to continue".
3. Enter your institutional email (ends in @rishihood.edu.in or @nst.rishihood.edu.in).
4. Complete sign-in. You will land on your personalised Dashboard.

Access Restricted

Only institutional email addresses are allowed. If you see an 'Access Blocked' screen, check you are using your university email, not a personal Gmail.

Roles & Access Control (RBAC)

Not everyone sees the same thing. Each person is assigned a role, and their role determines what they can see and do. This is intentional -- a student does not need to see the finance team's expense approval queue, and a club head does not need admin controls.

The Six Roles

Role	Who Is This	What They Can Do
ADMIN	LX Head / University Admin	Full access to everything. Create, edit, approve, and delete anything. Manage rooms, allocate budgets, view analytics, manage users.
LX TEAM	LX Team Members	Create and manage events, manage club budgets, approve events and achievements, view analytics and files. Cannot delete rooms or manage users.
CLUB HEAD	Head of a Student Club	Request events for their club, manage club profile, submit achievements, upload files. Cannot approve anything.
CLAN HEAD	Clan Leader	Manage own clan (events, initiatives), create events, submit achievements, upload files. Cannot approve or manage other clans.
FINANCE	Finance Team Member	See all expense and reimbursement requests, approve or reject them, view budget breakdowns, view analytics, access file repository.
GENERAL	All Other University Members	View published events and clubs, submit own achievements, upload files. Read-only access to most sections.

Permission Matrix

This table shows at a glance which role can perform which action across the platform.

Action	ADMIN	LX	CLUB	CLAN	FIN	GUEST
Create Event	Yes	Yes	Yes	Yes		
Approve Event	Yes	Yes				
Book Room	Yes	Yes	Yes	Yes		
Manage Clubs	Yes	Yes				
Manage Clans	Yes			Yes		
Allocate Points	Yes					
Submit Expense	Yes	Yes	Yes			
Approve Expense	Yes				Yes	
View Budget	Yes	Yes			Yes	
Submit Achievement	Yes	Yes	Yes	Yes		Yes
Approve Achievement	Yes	Yes				
View Analytics	Yes	Yes			Yes	
Manage Users	Yes					
File Repository	Yes	Yes	Yes	Yes	Yes	Yes

01. Dashboard -- Your Command Centre

The Dashboard is the first thing you see after logging in. It gives you a complete picture in under 10 seconds without clicking anything.

What You See

- Greeting with your first name and today's date.
- Four stat cards: Total Events, Active Clubs, Clans, and Upcoming Events.
- "Next Up" -- the very next approved event and how many days away it is.
- Quick Actions -- shortcuts personalised to your role. ADMIN sees Approvals, Budget, Analytics. CLUB HEAD sees Request Event and My Club.
- Recent Events list -- last 6 events with colour-coded status badges (Approved / Pending / Rejected).
- Pending Approvals badge -- if anything needs your action, a yellow badge appears immediately at the top right.

Why It Was Built This Way

Before this, a manager had to open WhatsApp, scroll through noise, check a calendar invite, and call someone just to know what was happening. The Dashboard collapses that entire routine into one screen. The pending approvals badge ensures nothing gets forgotten.

Before (The Old Way)

Open WhatsApp, scroll through multiple groups, check 3 spreadsheets, ask someone on call what is happening and what rooms are booked.

After (With LX OS)

Open LX OS. The dashboard shows everything in 10 seconds. Pending approvals are highlighted immediately.

Dashboard -- stat cards, Quick Actions, recent events, and pending approvals badge

02. Events -- From Request to Approval in One Place

Events are the heartbeat of student life. This module manages the full lifecycle: a club head requests an event, the LX team reviews and approves it, a room is booked, and the event shows up on the calendar -- all without a single email.

How It Works

1. A Club Head or Clan Head clicks "New Event" and fills in: title, description, date/time, event type, venue/room, and budget required.
2. The request appears in the Approvals queue for the LX Team and Admin.
3. The reviewer approves or rejects with one click, with an optional note.
4. On approval, the event is automatically added to the shared Calendar and the room is blocked.
5. The budget allocated appears in the Budget tracker automatically.

Key Features

- Status tracking -- every event has a visible status: Pending, Approved, Rejected, Completed, or Cancelled.
- Room conflict prevention -- you cannot book a room already taken for the same time. The system rejects double-bookings automatically.
- Budget on every event -- each event shows amount allocated so the finance team knows what has been committed.
- Colour-coded event types -- Club event (blue), Clan event (purple), LX event (green), Fest (yellow).

Before (The Old Way)	After (With LX OS)
<i>Club head texts on WhatsApp: "Can we use the seminar room on Friday?" No one knows if it is free. Reply takes a day. Eventually clashes with another event.</i>	Club head submits event request on LX OS with room selection. System checks availability instantly. LX Team approves in one click. Room is blocked automatically.

Create Event form -- title, date/time, room selector, budget, and event type

03. Rooms -- No More Double-Booking

The Rooms module is a real-time map of every bookable space on campus. 57 rooms are listed, each with capacity, amenities, and live availability. Anyone creating an event can see exactly which rooms are free for their chosen date and time.

Two Views

- List View -- all rooms with capacity, type, amenities (Projector, Whiteboard, AC) and live availability indicator (green dot = free).
- Calendar View -- see which rooms are booked on which days. The Room Booking Schedule makes conflicts immediately obvious with colour-coded blocks per room.

How Booking Works

1. When creating an event, select one or more rooms from the list. Already-booked rooms cannot overlap -- the system prevents it.
2. Once the event is approved, the room is automatically blocked for that time.
3. Nobody else can book the same room for the same time -- enforced at the database level.

Before (The Old Way)	After (With LX OS)
<i>Room booking happened on email or phone call. The booking was just a WhatsApp message saved in someone's phone. Clashes happened regularly.</i>	Every room booking is logged in the system. The calendar shows all bookings in colour. Double-booking is technically impossible.

Rooms list -- 57 rooms with capacity cards, amenity tags, and green availability indicator

Room Booking Schedule -- colour-coded calendar showing all room bookings across the month

04. Calendar -- The Whole University in One View

The Calendar page shows every approved event happening at Rishihood in a single, structured view. No more scrolling through WhatsApp group announcements that disappear into chat history.

What It Shows

- All approved events colour-coded by type (Club, Clan, LX, Fest).
- Click any event to see full details: venue, organiser, budget, description.
- Month, week, and day views -- switch at the top right.

Who Benefits Most

- Students -- know what is happening this week without asking anyone.
- LX Team -- can spot scheduling conflicts before approving a new event.
- Management -- overview of institutional activity at a glance.

Before (The Old Way)	After (With LX OS)
<i>"When is the next cultural event?" Someone has to remember or dig through WhatsApp. Half the campus misses events because announcements get buried.</i>	Open the Calendar. See everything. Every approved event is there.

Calendar page -- monthly view with colour-coded events by type (Club, Clan, Fest)

05. Clubs -- Student Organisations, Managed Properly

Every active student club at Rishihood has a profile on LX OS. The Clubs module makes it easy to track what each club is doing, how much budget they have, and who is leading them -- without needing to call anyone.

What a Club Profile Contains

- Club name, category (Academic / Cultural / Technical), description, and current head.
- Budget allocated vs. budget spent (live green progress bar).
- Events tab -- all events created by this club with count.
- Budget tab -- detailed budget breakdown for finance tracking.
- Updates & Blog tab -- club can post updates and announcements that go to the Activity Feed.

Club Head Actions

- Edit club profile and description.
- Create event requests on behalf of the club.
- Submit achievements and milestones.
- Post updates to the club blog (goes to Activity Feed on approval).

Before (The Old Way)	After (With LX OS)
<i>Clubs reported activity verbally or via annual reports. Management had no idea which clubs were active, which were dormant, or how much each had spent.</i>	Every club has a live profile. Budget utilisation is visible in real time. Management can see at a glance which clubs are active.

The screenshot displays the 'Clubs' dashboard in the LX Platform. The left sidebar contains navigation links: Dashboard, Feed, Calendar, Events, Clubs (selected), Clans, Rooms, Budget, Achievements, Analytics, Reimbursements, and Approvals. The main content area is titled 'Clubs' and shows '11 active organisations'. A '+ New Club' button is in the top right. The clubs are listed in a grid, each with a category tag, name, official name, and a budget progress bar.

Category	Club Name	Official Name	Budget Spent	Budget Remaining
ACADEMIC	Arthakram	Official Arthakram club	₹4,500 spent	₹5,500 left
ACADEMIC	ECell	Official ECell club	₹0 spent	₹10,000 left
ACADEMIC	Finanza Club	Official Finanza Club club	₹0 spent	₹10,000 left
CULTURAL	Inkspire Club	Official Inkspire Club club	₹0 spent	₹10,000 left
CULTURAL	Kalakriti	Official Kalakriti club	₹0 spent	₹10,000 left
CULTURAL	Navrasa	Official Navrasa club	₹0 spent	₹10,000 left
ACADEMIC	Public Policy Club	Official Public Policy Club club	₹0 spent	₹10,000 left
TECHNICAL	Robotics Club	Official Robotics Club club	₹0 spent	₹10,000 left
CULTURAL	Saarang	Official Saarang club	₹0 spent	₹10,000 left
TECHNICAL	Society for Aerospace and Space Technology	Official Society for Aerospace and Space Technology club	₹0 spent	₹10,000 left
CULTURAL	Swaarang	Official Swaarang club	₹0 spent	₹10,000 left

The user profile at the bottom left shows 'Neelanshu Karn' with the email 'neelanshu.2024@rst.rishihood...' and an 'Admin' role.

Clubs list -- 11 active clubs with category tags, budget spent, and budget remaining

The screenshot displays the 'Arthakram' club detail page. The left sidebar is the same as the previous screenshot. The main content area is titled 'Arthakram' with the category 'Academic' and the subtitle 'Official Arthakram club'. An 'Edit Club' button is in the top right. Below the title is a tabbed interface with four tabs: Overview (selected), Events (7), Budget, and Updates & Blog. The 'Overview' tab shows four cards: 'Budget Allocated' (₹10,000), 'Budget Spent' (₹4,500, 45.0% used), 'Events Hosted' (7), and 'Updates' (2).

Category	Club Name	Official Name
ACADEMIC	Arthakram	Official Arthakram club

Metric	Value
Budget Allocated	₹10,000
Budget Spent	₹4,500 (45.0% used)
Events Hosted	7
Updates	2

The user profile at the bottom left shows 'Neelanshu Karn' with the email 'neelanshu.2024@rst.rishihood...' and an 'Admin' role.

Club detail -- Arthakram: budget allocated/spent cards, events count, and updates count

The screenshot displays the LX Platform interface for the 'Arthakram' club. The left sidebar contains navigation links: Dashboard, Feed, Calendar, Events, Clubs (selected), Clans, Rooms, Budget, Achievements, Analytics, Reimbursements, and Approvals. The main content area is titled 'Arthakram Academic' and 'Official Arthakram club'. It features four tabs: Overview, Events (7), Budget, and Updates & Blog (active). The 'Post an Update' section includes a text input for 'Update Title (e.g., We won the Hackathon!)', a larger text area for 'Share what's happening...', an 'Add Image' button, and a 'Post Update' button. Below this, the 'Latest Updates' section shows a post titled 'Responsibilities:' with a bulleted list: 'Build and scale your own products from ideation through growth (0-to-1 to scale)', 'Hands-on building: you're in the code/design/research, not just overseeing', 'Personally own one product as your bet - the one that reaches real scale', and 'Collaborate with **Product Pods** (Tanish) and Consulting Vertical on handoffs'. A second post is titled 'Selected Neelanshu as the Head of Ventures' dated '21 June 2026', with the text: 'We are starting a new journey. Shipping numbers of products the next sem and believe a few of them reach a great scale. Here is the offer letter of neelanshu attached below.' The bottom of the sidebar shows the user profile for 'Neelanshu Karn' with a 'Sign out' link.

Club Updates & Blog tab -- post announcements and updates that flow into the Activity Feed

06. Clans -- Friendly Competition, Properly Tracked

Rishihood has four clans: Maratha, Vijaya, Rajputana, and Chola. The Clans module replaces the manual Excel sheet used to track clan points with a live leaderboard and full activity breakdown per clan.

What the Clans Page Shows

- Live leaderboard -- all four clans ranked by current points with colour-coded summary cards at the top (Maratha = red, Vijaya = yellow, Chola = blue, Rajputana = green).
- Per-clan breakdown: total points, percentage of total, point history, budget utilisation, achievement count, events organised.
- Point delta -- the +/- change since last update is shown next to each clan's name.
- Per-clan analytics tab -- 3D bar chart, pie chart of points distribution, and all-time leaderboard.
- Initiatives tab -- active projects with progress bars, assigned teams, and deadlines.

How Points Are Managed

- ADMIN can add or deduct points for any clan at any time with a reason note -- full history is logged.
- Achievements approved for clan members automatically contribute to clan points.

Before (The Old Way)	After (With LX OS)
<i>Points were updated in a shared Excel file. Disputes were common because the file had no audit trail. Students did not trust the numbers.</i>	Points are updated in LX OS with a timestamp and reason. Full history is visible. Every change is traceable. No disputes.

Clans leaderboard -- all four clans with live points, colour-coded bars, and point deltas

Clan Analytics -- 3D bar chart and pie chart showing points distribution across all clans

The screenshot displays the LX Platform interface for the 'Vijaya' clan. The left sidebar contains navigation links: Dashboard, Feed, Calendar, Events, Clubs, Clans (selected), Rooms, Budget, Achievements, Analytics, Reimbursements, and Approvals. The main content area is titled 'Vijaya' with a 'Vijay Ho!' greeting. It features a 'Manage Points' and 'Edit Clan' button. Below this, four summary cards show: Total Points (10), Budget Allocated (₹10,000), Budget Spent (₹0), and Budget Remaining (₹10,000). A tabbed interface includes Overview, Events, Budget, Initiatives (selected), Blog, and Analytics. The 'Clan Initiatives' section, with a 'New Initiative' button, tracks and manages Vijaya initiatives and projects. It displays four status cards: 1 Active, 1 Planning, 1 Completed, and 63% Avg Progress. Two initiatives are listed: 'Green Campus Initiative' (Active, High priority, 65% progress) and 'Student Mentorship Program' (Planning, Medium priority, 25% progress). Each initiative card includes a description, progress bar, start date, target date, assigned team, and creator. The bottom of the screen shows the user profile for Neelanshu Karn, an Admin, with a 'Sign out' option.

Clan Initiatives -- active projects with progress bars, priority tags, and assigned teams

07. Achievements -- Every Win, Recorded and Searchable

Student achievements -- competition wins, certifications, sporting victories, cultural honours -- are now submitted through the platform, reviewed by the LX Team, and stored in a searchable record. Every approved achievement also appears in the Activity Feed.

Search by Student Name

The Achievements page has a prominent search bar: "Search by person, title, club...". There is also a filter by person at the top -- showing each student who has a logged achievement with a count. Click any name to filter to their achievements only. This is powerful for recommendation letters and year-end reviews.

How It Works

1. Any member submits an achievement: title, description, category, date, participants, photos, and linked club/clan.
2. The submission appears in the Approvals queue for LX Team or Admin.
3. On approval, the achievement is published and appears in the Activity Feed.
4. The achievement is linked to the student's name and is searchable instantly.

Before (The Old Way)	After (With LX OS)
<i>Achievements were announced on WhatsApp, maybe noted in a register. Six months later, no one could tell you what a particular student had achieved.</i>	Every achievement is logged, categorised, and searchable by name. Management can pull a student's full record in seconds.

Achievements page -- search bar, person filter chips, and achievement cards with category tags

Add Achievement form -- title, category, date, participants, photos, and club/clan link

08. Reimbursements -- One Platform, Not Ten Sheets

The Expenses module handles the entire reimbursement workflow -- from a student raising a request to the finance team processing it. It replaces the current system of managing 10+ separate Excel sheets for different clubs and events.

How It Works

1. Student submits a reimbursement: attach bill images, describe the expense, enter amount, category (Food/Travel/Materials/Equipment/Printing/Accommodation/Other), link to an event, and enter bank account details for payout.
2. The request enters the Approvals queue for LX Team (first review).
3. LX Team approves and it moves to the Finance team.
4. Finance processes the payment. The submitter sees the full timeline: Raised > LX Approved > Finance Processed.

Live Summary Strip (Admin and Finance)

- Total submitted -- count and total rupee value.
- Pending review -- what needs action right now.
- Approved -- cleared and awaiting finance processing.
- Rejected -- with reason visible to submitter.

Before (The Old Way)	After (With LX OS)
<i>Students emailed receipts to coordinators who filled separate Excel files. Finance received them sometimes late, sometimes never. Status required a phone call.</i>	Student submits on LX OS. Status updates automatically. Finance sees everything in one queue. No Excel files. No phone calls. Full audit trail.

Reimbursements
4 total · 1 pending review

Summary:

- 4 Total submitted ₹9,896
- 1 Pending review ₹776
- 1 Approved ₹4,500
- 0 Processed ₹0
- 2 Rejected ₹4,620

09. Budget -- Where Every Rupee Goes

The Budget page gives ADMIN and Finance a live view of budget allocation and spend across all clubs and clans -- without opening a single spreadsheet. With Rs.1,50,000 total allocated across 11 clubs and 4 clans, the budget page shows utilisation at a glance.

What You See

- Four summary cards: Total Allocated, Total Spent, Remaining, and Approved Expenses.
- Clubs section: all 11 clubs with rupees left and utilisation percentage. A green progress bar appears for clubs actively spending.
- Clans section: all 4 clans with budget allocated and remaining.

Only ADMIN and FINANCE can access the Budget page. Club heads cannot see the budget of other clubs.

Before (The Old Way)	After (With LX OS)
<i>Budget tracking was a shared Google Sheet or Excel file. Updating it required someone to calculate manually and hope no one was editing it simultaneously.</i>	<i>LX OS calculates and displays live budget data automatically from every approved event and expense. No manual updates needed.</i>

Budget page -- Rs.1,50,000 total with clubs breakdown (Arthakram at 45%) and clans breakdown

10. Approvals -- Your Action Queue

The Approvals page is a unified inbox of everything that needs a decision. Instead of hunting through emails and WhatsApp messages, everything requiring action is listed here with inline Approve / Reject buttons.

What Appears in Approvals

- Event requests -- for ADMIN and LX TEAM (currently 6 pending shown).
- Room booking requests -- for ADMIN and LX TEAM.
- Achievement submissions -- for ADMIN and LX TEAM.
- Expense and reimbursement claims -- for FINANCE only.

How to Approve -- 3 Seconds Per Item

1. Go to Approvals in the left sidebar.
2. See all pending items listed with the requester name and date.
3. Click the green "Approve" button or red "Reject" button inline -- no need to open the item.
4. Click "Open" to see the full detail before deciding if needed.

Before (The Old Way)	After (With LX OS)
<i>Approval requests arrived via WhatsApp, email, or in-person. Easy to miss. No audit trail of who approved what and when.</i>	Everything needing a decision is in one queue. One click to approve. Every approval is logged with who approved it and when.

The screenshot displays the 'Approvals' page in the LX Platform. The left sidebar contains a navigation menu with options: Dashboard, Feed, Calendar, Events, Clubs, Clans, Rooms, Budget, Achievements, Analytics, Reimbursements, and Approvals (highlighted). The main content area is titled 'Approvals' and shows '6 pending' requests. Each request is an event with a title, organizer, and date, followed by 'Open', 'Approve', and 'Reject' buttons.

Event	Organizer	Date	Open	Approve	Reject
Arthakram Research Tool	By Arthakram Rishihood University	6/21/2026	Open	Approve	Reject
Program Fest - Ankit Goswami session	By Arthakram Rishihood University	6/21/2026	Open	Approve	Reject

Diplomacy in the modern world	By Arthakram Rishihood University	6/21/2026	Open	Approve	Reject
Velectron Labs Consultation review meeting	By Arthakram Rishihood University	6/21/2026	Open	Approve	Reject
Masterclass with Mr. Tanmoy Sinha	By Arthakram Rishihood University	6/21/2026	Open	Approve	Reject

The bottom of the page shows the user profile for Neelanshu Karn, with an 'Admin' role and a 'Sign out' button.

Approvals page -- 6 pending event requests with inline Approve (green) and Reject (red) buttons

11. Activity Feed -- The University Noticeboard

The Activity Feed is a live stream of everything happening at Rishihood -- every approved achievement, event, and club update, in one scrollable view. Think of it as the institutional noticeboard that actually stays up to date.

What Appears in the Feed

- All approved achievements with category tag (Academic, Sports, Cultural, Technical, Social) and club/clan tag.
- Club blog posts and updates posted by club heads.
- Activity sorted by most recent first.

Why It Matters

Students and staff often don't know what other clubs and clans are doing. The Activity Feed creates visibility -- a culture of recognising each other's work. When something great happens (a competition win, a community initiative), it goes on the Feed automatically upon approval.

Before (The Old Way)	After (With LX OS)
<i>Good news was shared on WhatsApp where it got lost. Some achievements were never publicised at all. There was no institutional memory.</i>	Every approved achievement lands in the Activity Feed. The whole university can see what is happening.

Activity Feed -- scrollable stream of recent achievements and club updates with category tags

12. Analytics -- Data That Tells a Story

The Analytics page gives management and the LX Team a visual overview of institutional activity -- how many events, which clubs are most active, where the budget is going, and how clans are performing. All in charts, not spreadsheets.

What the Charts Show

- Top stat strip: Total Events (8), Budget Allocated (Rs.1,50,000), Expenses (Rs.0), Achievements (2).
- Club Activity -- bar chart showing events organised per club. Arthakram leads with 7 events.
- Events by Type -- donut chart of Club / Clan / LX / Fest distribution. Currently 100% Club events.
- Budget vs Spending -- grouped bar chart comparing allocated vs spent per club.
- Clan Performance -- bar chart of total points earned per clan (Maratha leads with 20 pts).

ADMIN, LX TEAM, and FINANCE only. This is not a public page -- it contains financial and performance data.

Before (The Old Way)	After (With LX OS)
<i>Management asked for a quick data summary and someone had to spend 2 hours pulling numbers from multiple files.</i>	Open Analytics. The charts are already built and live. Screenshot for your next presentation. No data wrangling needed.

Analytics page -- stat strip, Club Activity bar chart, Events by Type donut, Budget vs Spending, and Clan Performance

13. File Repository -- Documents, Centralised

The Files module is a shared document repository for the institution. SOPs, event reports, receipts, approvals, club constitutions -- any important document can be uploaded here and found by anyone with access.

ADMIN, LX TEAM, CLUB HEAD, CLAN HEAD, and GENERAL users can upload files. FINANCE has read-only access. Only ADMIN can delete files.

Documents that live only in someone's email inbox or WhatsApp chat are functionally invisible to everyone else. The File Repository ensures that institutional documents are findable, accessible from any device, and not lost when someone leaves.

Works on Your Phone

LX OS is fully responsive. Every page -- Dashboard, Events, Approvals, Calendar, Clans -- is designed to work on a mobile browser without any compromise.

No App Required

Open Chrome or Safari on your phone and go to learnerexperienceos.vercel.app. Log in once and you are in. You can add it to your phone home screen as a shortcut for one-tap access.

This matters especially for the LX Team and Admins who are on the move. You do not need to be at a desk to approve an event request or check what is happening this weekend. The reimbursement submission form below is a full-featured mobile experience.

Quick Reference

Bookmark this table. It covers the most common tasks and where to find them.

I want to...	Go to...	Who can do it
Request a room for an event	Events - New Event	CLUB HEAD, CLAN HEAD, LX, ADMIN
Approve a pending event	Approvals	LX TEAM, ADMIN
Check which rooms are free	Rooms - Calendar tab	Everyone
See this week's events	Calendar	Everyone
Submit a reimbursement	Reimbursements - Submit Request	CLUB HEAD, LX TEAM, ADMIN
Approve a reimbursement	Approvals (Finance queue)	FINANCE, ADMIN
Add clan points	Clans - Manage Points	ADMIN only
Submit a student achievement	Achievements - Submit	All roles
Approve an achievement	Approvals	LX TEAM, ADMIN
Check budget utilisation	Budget	ADMIN, FINANCE
View analytics charts	Analytics	ADMIN, LX TEAM, FINANCE
See all club activities	Activity Feed	Everyone
Search a student's achievements	Achievements (search bar)	Everyone
Post a club update	Clubs - Updates & Blog tab	CLUB HEAD, ADMIN
